

NEW Lyson Professional Inksets & Media

- Professional bulk inks at a quarter (125ml size) or even a tenth of the cost (1 litre size) of Original Equipment Manufacturer (OEM) cartridge prices.
- Half price professional gloss and satin waterproof premium inkjet paper in NEW economy bulk packs.
- Exciting NEW advanced professional inksets and bulk ink delivery systems for Epson and Canon inkjet printers.
- Unrivalled print quality in colour and monochrome.
- As used by numerous professional photographers and discerning enthusiasts.

World's largest independent

Lyson is the largest independent inkjet inkset manufacturer in the world, with substantial manufacturing plants in the UK (Stockport) and USA (Chicago). They also have a major European distribution centre in Dusseldorf, Germany. Their extensive research and development laboratories in the UK produce advanced and reliable inksets. Lyson professional cartridge inks and bulk inks in 125ml, 500ml and 1 Litre sizes enable you to produce the finest professional photographic quality prints – superior in appearance, physical performance and economy to consumer brand inksets

NEW for 2006 is the innovative **Lyson PhotoChrome3K** inkset for use with the Epson R2400, 4800, 7800 and 9800 inkjet printers

In common with the OEM product, this eight channel pigment inkset comprises Black, Light Black, Light Light Black, Cyan, Light Cyan, Magenta, Light Magenta and Yellow. Fine ground pigments allow you to produce excellent gloss and lustre prints with minimal sheen differential (bronzing), and three dedicated monochrome channels enable you to produce stunning neutral monochromes of excellent smooth graduation with negligible metamerism. At last, professional quality colour and black & white printing from the same inkjet printer. **Litre bottles of Lyson PhotoChrome3K inks are priced at a particularly keen £85.00+VAT each** to tempt large format customers with a significant price advantage over the OEM cartridge cost – **about one-third of the price!** *Certified 75 year longevity with excellent image stability and durability.*

Apply now for your free R2400 Lyson PhotoChrome3K test print. See back page.

NEW for 2006 is the all-new **Lyson PhotoChromeR** inkset for use with the Epson R800 and R1800 inkjet printers

This eight channel pigment inkset comprises Matte Black, Photo Black, Cyan, Magenta, Yellow, Red, Blue and Gloss Optimiser, in common with the OEM product.

Optimised for colour printing, this inkset combination uses the extra Red and Blue channel to enhance the colour range available, and the Gloss Optimiser lays down a clear layer over the areas of the print, which are lightly coated in ink or have no ink application at all, to produce a uniform sheen level, minimising bronzing. The Gloss Optimiser feature is usually turned off when printing on matt materials. The two black channels allow good quality black & white printing, although most highly critical monochrome printers may prefer to use the Lyson PhotoChrome3K inkset on the Epson R2400, 4800, 7800 and 9800 printers. *Certified 75 year longevity with excellent image stability and durability.*

Apply now for your free R1800 Lyson PhotoChromeR test print. See back page.

NEW Lyson continuous ink system (CIS) for the Epson R800 and R1800 at the **reduced price of £139.99 & £149.99+VAT** respectively.

The CIS is easily installed, trouble-free in use and saves you a fortune!

NEW for 2006 are the **all-new refillable clear acrylic 220ml cartridges** for the Epson 4000, 7600 and 9600 inkjet printers

You simply refill these new see-through cartridges from the Lyson 1 litre bottles of ink. The comprehensive starter kit, including eight refillable cartridges is **£99.00+VAT** (excluding inks). 1 Litre bottles of Lyson PhotoChrome pigment inks to suit these printers have been **reduced to £85.00+VAT** each to tempt **large format customers** with a very significant price advantage over the OEM cartridge cost – **about one-third of the price!**

Prices of standard Lyson PhotoChrome pigment ink cartridges for these printers have been **significantly reduced** to maintain a worthwhile price differential between Lyson and OEM product.

Certified 75 year longevity with excellent image stability and durability.

NEW Lyson continuous ink system (CIS) for the Epson R2400 at the **reduced price of £149+VAT**

The CIS is easily installed, trouble-free in use and saves you a fortune! CIS systems for the Epson 4800, 7800 and 9800 are to be announced shortly.

NEW for 2006 is the much requested Fotonic (colour) and Quad Black (monochrome) inksets for use with the **new Canon i9950** desktop inkjet printer.

In common with the OEM product, this eight channel dye-based inkset comprises Black, Cyan, Light Cyan, Magenta, Light Magenta, Yellow, Red and Green for colour printing. *Certified 25 year longevity.* Changing the Canon removable head assembly allows you to run the alternative Lyson Quad Black Neutral monochrome printing inkset for B&W printing. *Certified 100 year longevity.*

NEW Lyson continuous ink system (CIS) for the Canon i9950 at the **reduced price of £149+VAT**

Easily installed, trouble free etc, you know the rest!

Two of Lyson's most popular papers now at **half price!**

As the majority of your print cost is inkjet printing paper, Lyson have resolved for 2006 to provide their two most popular waterproof professional papers, the Lyson 265gsm Pro Photo Gloss and Lyson 265gsm Pro Photo Satin in bulk 250 sheet A4 and 150 sheet A3 economy trade packs at **half the usual price per sheet.**

These attractive bright white papers with a hard waterproof coating are not to be confused with the usual lower quality economy inkjet papers on the market, and are eminently suitable for the new generation pigment inks, as well as the more traditional dye-based inksets used in standard desktop inkjet printers.

In addition, in response to many requests from professionals and enthusiasts alike, all Lyson media is supplied in shrink wrapped matt-black portfolio boxes. You can use these sturdy boxes to store and present your finished prints to clients and friends in a truly professional manner.

NEW for 2006 are the unique Lyson **275gsm Photo Art Pro Silk** and **275gsm Photo Art Pro** fine art papers

These new papers should satisfy our more critical high-end customers.

In the interests of streamlining the Lyson media range, Lyson Darkroom Semi Gloss, 240gsm Pro Colour Gloss, 280gsm Premium Smooth Photo Gloss and Satin, and 200gsm Lyson Smooth Fine Art have been discontinued.

NEW Ultra Gloss Print Guard

Revitalises your gloss prints

Lyson have just introduced their Ultra Gloss Print Guard for those photographers who recall the fabulous Cibachrome® high gloss finish with its amazing vibrancy and depth of colour – rivalling a transparency.

Today, across all brands of pigment inkjet inksets, the latest generation pigment inks all have a slight tendency to subdue the gloss level of prints. Lyson Ultra Gloss Print Guard is ideal to counteract this.

A light spray of this clear, durable, waterproof ultra gloss coating can transform your colour prints. It also works with certain monochrome subjects – accentuating the shadow details and making the blacks more defined. Price: **£9.95+VAT** for 400ml aerosol.

SPECIAL OFFER

FREE Lyson Test Print for evaluation

To test your printer for colour accuracy and image quality

We are offering FREE A3 test prints to enable you to assess the print quality of Lyson inkjet inksets. Once you receive the print from us you will be given instructions on how you will be able to download the same digital image file for you to print on your own printer to compare for colour accuracy and image quality.

We are offering an **Epson R1800 Lyson PhotoChromeR** A3 test print, containing colour and monochrome elements and an **Epson R2400 Lyson PhotoChrome3K** A3 test print, containing colour and monochrome elements.

If you would like to receive test prints using other Lyson inksets – Fotonic, Small Gamut, Quad Black etc. – we will be happy to post them to you. Just let us know what you would like to have sent to you, by simply e-mailing your request to:

lyson@marrutt.com

giving us your name, full postal address and telephone number. We would also appreciate knowing what printers, inksets and inkjet papers you use.

Lyson ink & Media – *the most popular choice*

Lyson ink and media combinations are used by numerous social and wedding photographers for portraiture, wedding albums, multi-print packages and package prints, and is the most popular choice for professionals and discerning enthusiasts.

Subscribe for News updates

To be kept up-to-date with news of new Lyson products as soon as they are announced, you can now register via e-mail at **lyson@marrutt.com** with the words "Subscribe Lyson" as the Subject, and your name, full postal address and telephone number as the Message.

We would also appreciate knowing what printers, inksets and inkjet papers you use.
